Summary

MCA student at Techno College Hooghly (2025–2027) with a current CGPA of 8.82 and a B.Sc. (Honours) in Computer Science from the University of Kalyani (2025). Possess a solid foundation in programming, database management, and scripting, along with practical experience developing AI-enabled full-stack web applications. Complemented by cybersecurity knowledge gained through industry-recognized certifications and a professional job simulation. Eager to begin a career as a Software Engineer or Software Developer, contributing strong analytical, coding, and problem-solving abilities to build innovative and impactful software solutions.

Education

Techno College Hooghly <i>Master of Computer Applications (MCA) — CGPA: 8.82</i>	West Bengal, India 2025 – 2027
University of Kalyani <i>B.Sc (Honours) in Computer Science — 80.92%</i>	West Bengal, India 2025
W.B.C.H.S.E (Higher Secondary) <i>Higher Secondary — 80.20%</i>	West Bengal, India 2022
W.B.B.S.E (Madhyamik) <i>Secondary — 78.71%</i>	West Bengal, India 2020

Technical Skills

Programming Languages: Java, Python, C, C++
Web Technologies: HTML, CSS, JavaScript, PHP
Databases & Auth: SQL, Email OTP Authentication
AI/Chatbot: RASA (Conversational AI), Applied AI with Python
Tools & Technologies: Git, MS Excel, MS Word, MS PowerPoint
Core Concepts: Data Structures, Object-Oriented Programming, DBMS, Cybersecurity Fundamentals, Full-Stack Web Development

Projects

SmartHire — AI-Powered Recruitment Platform <i>Full-Stack Web Application — React, Tailwind CSS, Spring Boot, MySQL, Cloudinary</i>	Jul 2026 – Aug 2026
- Developed a full-stack recruitment platform connecting students, recruiters, and administrators through role-based dashboards and workflows. - Implemented student registration/login, recruiter job posting, job applications, applicant management, interview shortlisting, approval/rejection workflows, and email-based notifications. - Integrated an AI-based resume scoring module to evaluate candidate–job compatibility and assist recruiters in faster candidate screening.	
CGAN-Based Trace Augmentation for Side-Channel Attack on ML-KEM <i>Research Project — Python, PyTorch/TensorFlow, GAN, PQC Certificate Awarded; Under Review for Book Publication</i>	Sep 2025 – Dec 2025
- Designed a Conditional Generative Adversarial Network (CGAN)-based framework to generate realistic synthetic power traces for ML-KEM (CRYSTALS-Kyber). - Addressed the challenge of limited and imbalanced side-channel datasets by augmenting trace data, reducing dependency on extensive physical trace collection. - Improved machine learning-based profiling attack performance by training models on CGAN-augmented traces alongside real side-channel data.	
Online Tutor Finder <i>Full-Stack Web Application — HTML, CSS, JavaScript, PHP, Python, RASA</i>	Jan 2025 – Aug 2025
- Built a full-stack platform to connect students and tutors with dedicated, role-based profiles for each user type. - Implemented a tutor interview and verification system to ensure quality and trust on the platform. - Developed location-based tutor search to help students find nearby tutors matching their requirements. - Engineered secure user authentication using email-based OTP verification. - Integrated a RASA-powered AI chatbot to assist users with queries and streamline tutor discovery.	

Certifications

Certificate of Participation in International Conference on “Adapting to Change and Creating a Sustainable Future through Knowledge” — Bhairab Ganguly College
Tata Cybersecurity Security Analyst Job Simulation — Forge
Add-On Course: Way to AI using Python
